Human perception is linear.

Log axes are great for detailed understanding, not for instantaneous recognition.

HOW POPULAR IS YOUR BIRTHDAY?

Two decades of American birthdays, averaged by month and day.

Notes: The conception date, purely for illustration, is 266 days prior to birth. It represents a hypothetical "moment of conception" based on the normal gestation period for humans, 280 days, minus the average time for ovulation, two weeks.

Data: U.S. National Center for Health Statistics (1994-2003); U.S. Social Security Administration (2004-2014) — via [FiveThirtyEight](#)
